

GHIBLI

31 mc 8 P - 41 mc 20 P - 51 mc 20 P - 41x2 mc 20 P

The extraordinary design reduces the footprint of the machine and improves ergonomics and usability. Great volume lids are made of thermoformed plexiglass on mod. 51 and 41x2, while on mod. 31 and 41 are made of injected Tritan®.

Easily removable sealing bar.

Extremely easy to clean thanks to the flatness of the product tray, made of AISI 304 stainless steel 5 mm thick.

Lid lifts up automatically with pneumatic pistons.

Including taper support for bags with liquid.

GHIBLI 51 mc 20 P

GHIBLI 41x2 mc 20 P

✓ Built in thermal label printer to fix date, time and packing specifications on every single bag (standard)

OPZIONI/OPTIONS

+ External suction hose

+ Gas flush system option (MAP)

+ **SanO3** - integrated and automated sanitizing system with Ozone

+ **A.O.R.** - Automatic Oil Replacement

+ Plexiglass support

+ Containers GN 1/1 - 1/2 (h.100/150) with s/steel cover
0-100% vacuum

+ Containers GN 1/1 - 1/2 - 1/3 (h.100/150) with cover in Tritan
0-80% vacuum

SAT SYSTEM WINDSHEAR SAT - GHIBLI 30 SAT - GHIBLI 40 SAT - GHIBLI 40x2 SAT

Sat System is an optional function that allows you to quickly connect a second satellite machine to the main machine to be used instead of or simultaneously with the main machine.

With a small investment, you can thus double productivity as if you had two machines available or you can have a satellite machine specifically dedicated to liquid or powdery products (Windshear SAT).

Ideal for:

- all health and hygiene situations where the use of different machines for different products is required.
- those who want to be faster in preparing their vacuum workload
- those who want to exploit the maximum capacity of the bags with liquid products (using Windshear SAT)

It is recommended to use satellite units of the same size as the main machine or smaller
